

LETTER TO THE EDITORS FROM THE ANAIS DA FACULDADE DE MEDICINA DE OLINDA

Inácio de Barros Melo Neto

General director at the Faculdade de Medicina de Olinda

Dear Editor,

The management of the Faculdade de Medicina de Olinda (FMO) congratulates the editors and authors of the 2nd Edition of the Revista Anais FMO. The dedication and passion you have shown in constructing new knowledge motivates us to continue this project as a fundamental instrument for disclosing knowledge.

Aiming to fulfill the mission of building innovative medicine using evidence and scientific knowledge, and mainly concerned with training human professionals, these seeds are being planted and their fruits will be harvested in the near future. It takes courage to question and deconstruct what is passed down to us as absolute truth, and the impetus to build a new truth. It is in this spirit that the journal is created, intended to be a repository of knowledge, encouraging academic protagonism, with the vision that we must create knowledge more than receive it.

Let us remain at the heart of the construction of knowledge, hoping that the journal represents a look to the future with determination and courage. Congratulations to you and all the authors who contributed to making this dream come true. Let us move towards the future.
