Summary

Letter to the Editor

Inácio de Barros Melo Neto

Original Articles

✚ Potential years of life lost due to diseases of the circulatory system in a capital of Brazilian Northeast

Cristyane Nathalia Gomes Mendonça, Conceição Maria de Oliveira, Marcela Franklin Salvador de Mendonça

✚ Prevalence of depressive and anxious symptoms among primary health care professionals in a city in the metropolitan region of Recife, Pernambuco

Ana Paula Rocha da Costa, Andrezza Soares Souto, Igor Almeida de Moura Barros, Maria Carolina Francino Ferreira Santos, Jéssica Rodrigues Correia e Sá

✚ Relationship between myocardial perfusion scintigraphy and workload in the identification of patients at high risk for myocardial ischemia

Giovanna Sherly de Sá Guedes Marins, Fernando Augusto Pacífico, Dolly Brandão Lages, Michelle Alves de Farias, Mário Cruz Couto, Liliam de Souza Santos, Eduardo Lins Paixão

✚ The meaning of being hypertensive from the experience of users accompanied by the family health strategy.

Flávia Souza Rosa Brandão, Maria Natália Barros Lopes da Cruz Baggio

✚ Angioarchitecture of the middle meningeal artery in human bone heads: a morphometric study

Ismael Felipe Gonçalves Galvão, Fernando Augusto Pacífico, Bruna Laryssa Santos Borges Machado, Isabella Cristina Oliveira Pacheco, Luciana Larissa Rodrigues dos Santos Queiroz, Renata Cristinny de Farias Campina, Olávio Campos Júnior

✚ Impact of human papillomavirus vaccine on cases of cervical cancer in young women in Pernambuco state

José Kaellyson Barbosa dos Santos Oliveira, Joyce Nobre Tavares, Leila Maria Carlos Teixeira, Maria Clara Silva Rocha, Sarah Oliveira Porto, José Lancart de Lima, Conceição Maria de Oliveira

✚ Frequency of symptoms in patients with suspected hyperprolactinemia admitted to a private psychiatric clinic in Recife

Emilly Kelly Paiva Damasceno, Gabriel José Paiva Aldeman, Andréia Veras Gonçalves

+ Prevalence of Polycystic Ovarian Syndrome in a gynecology outpatient in the city of Olinda, Pernambuco, between 2018 and 2020

Myllena Alves Rodrigues, Suellen Nunes de Oliveira, Amanda Fontes Rego, Lorena Magale Dantas

+ Analysis of the health risk factors that interfere in the health off selfish gatherers on a beach on the south coast of Pernambuco

Larissa Souza Penalva, Monic Alves de Lima, Morgana Vital de Araújo, Karoline Albuquerque Farias, Albert Eduardo Martins.

Case Report

+ Vulvar lesion is not always a Sexually Transmitted Infection: report of a case of vulvar hidradenoma papilliferum

Fernando Augusto Pacífico, Luciana Maria Queiroz de Oliveira Borges, Ismael Felipe Gonçalves Galvão, Joanna Pimentel de Vasconcelos, Ana Claudia Pimentel de Vasconcelos, Angelina Farias Maia, Petrus Augusto Dornelas Câmara

Experience Report

+ Educational actions for the prevention and control of tuberculosis: an experience report

Flávia Souza Rosa Brandão, Cynthia Galvão Inácio, Eduarda Lima de Amorim Gomes, Francisco Gustavo Carneiro Medeiros, Suellen Pâmala Salgueiro de Aquino

+ *Critical Review*

By: Mário Cruz Couto; Fernando Augusto Pacífico

Letter to the Editor

Inácio de Barros Melo Neto

Dear editor,

In another issue of the Annals of Olinda Medical School, we are excited to confirm that the results of the investments made by the Faculdade de Medicina de Olinda (FMO) are strengthening the teaching and research. With the journal indexed and recognized by national and international bodies, our academic productions are boosted and can be read in Portuguese and English; thus, reaching the international academic community. Each issue brings new original articles, reviews of current books, and experience reports focused on social responsibility.

In this issue, we also stated the investments made in the medical training of our students, with the Institutional Scientific Initiation Program (PRODIIC - 2024) reaching 63 research projects, demonstrating the capacity of Master's and PhD professors and the proposition of relevant projects to the progress of science and the society.

In a cross-sectional way, the FMO Global Program continues to offer the opportunity to deepen in languages (focus on the English language) to enable students to develop a global mentality and local actions socially referenced in their medical practice. Currently, over 850 students are actively practicing the English language. The results of this semester showed that more than 24,000 activities were conducted on the language teaching platform, while the number of correct answers exceeded 70%. We also provide eight face-to-face English courses, each with a qualified teacher who constantly monitors approximately 100 students, making the learning process even more engaging.

Equally significant is the role of our 28 Academic Leagues from several medical specialties. They zealously fulfill our objectives of consolidating the goals related to social responsibility, as well as offering a diverse range of training actions for FMO students and those from other institutions seeking to enhance their knowledge. They achieve this through a series of education and health promotion actions aimed at users of the Unified Health System and communities in socially vulnerable areas and with limited access to quality health services.

To reinforce our social responsibility, we are celebrating the 1st year of the Instituto Maria, which offers multidisciplinary care (medical care, physiotherapy, speech therapy, occupational therapy, dentistry, psychology, psychopedagogy, physical education, music therapy, and social work) to children with Down syndrome as a fundamental principle; thus, providing conditions for the insertion of these individuals into the world of work and society and qualifying them to enjoy opportunities throughout life. Currently, we follow and support 218 children and families from 37 municipalities in the state of Pernambuco. Soon, it will become a center for research focused on this population.

In the field of teaching, we started the ultrasound service in 2024 to expand the

training of our students and provide the opportunity to be ahead of time in the field of medicine. We also resumed our mentoring program by making qualified teachers available to our students to model a training that is closely personalized to the needs of students. Let's keep working in a cohesive and qualified manner, so doctors trained by our institution can stand out in society as a consequence of technical and humanistic capacities and have solid ways for disseminating their scientific productions, such as our journal.
